

# TOURING FORCE-SC

Urban scooter tyre for a short city trip  
or for longer journeys

# TOURING FORCE-SC

## COMFORT AND SAFETY

High dimensional stable carcass technology and a specially developed tread compound, provide high riding comfort and excellent handling performance.

## OPTIMUM CONTACT AT MAXIMUM LEAN ANGLES

The tread pattern ends before the edge of the tyre shoulder and delivers great stability; precision on straights and bends and grip in all weather conditions.

## EXCELLENT WATER DISPLACEMENT

3D virtual technology used during the development of tyre construction ensures correct water displacement and balanced tyre wear.

## HIGH GRIP

The unique tread compound using end-functionalized S-SBR elastomers together with high active reinforcing filler in combination with special resins, is a guarantee for high grip in wet and dry conditions.

TOURING FORCE-SC line is ideal for any scooter type and will be progressively available for sale in wide range of sizes during 2018 and 2019.
